Christelle

Date	Tasks	Time
13 Feb	Weekly meeting - discussed task planning and details of check-in	30 min
14 Feb	US-3,5,12,13: Started writing the tests and the routes for the CRUD operations for the vehicle US-8.3: Connect the database to the website	5h
15 Feb	Redefined the project structure with Imen for clarity (30 min) US-3,5,12,13: Continue writing the test for the vehicle CRUD operations	6h
16 Feb	US-3,5,12,13: Finished the tests and the routes for the CRUD operations for the vehicle (open pr) US-4,8,10,11: Wrote the tests and the routes for the CRUD operations for the 3 user types (open pr) US-1,2,6,7: Started writing the tests and the routes for the CRUD operations for the reservations	7h
17 Feb	US-6: When the user deletes a reservation, the reservation is deleted and also removed from the user's reservation "pool" (open pr) "Doc": Wrote for the team a summary of the database queries and the 5 database tables we are using so far to help with the pr reviews	3h
20 Feb	US-4: Added a password field in the database for all three users and fixed the user creation tests accordingly. "Bug fix": The front end could not connect to the database due to the missing middleware. Added the middleware, and wrote a testApi() to make sure that the database is connected and available to the frontend. Wrote an example on how to make post and put requests to the API from react.	8h
22 Feb	Spent some time with Malak to answer her questions about the backend work for the reservation and the vehicles. Wrote an example get request on React to help.	1h30
25 Feb	US,1-2-6-7: Merged main into the pr and fix the failing tests. Implemented the new api routes. Merged to main. "Bug fix": Fix the open handler error in the jest test Spent some time with Imen debugging and discussing how to create unique IDs	5h

27 Feb	Wrote the clean version of meeting minutes 1,2	30 min
29 Feb	CRUD operation vehicles: added a new databases field for the car availability and fix database test (30min) Spend some time with Rania to explain the backend (30min)	1h
March 1st	Help Rania debug the cancellation page (50 min) US-9.5: Check the login in information the backend for all 3 user types + tests (1h30)	2h40
March 3rd	Wrote acceptance tests, fixed the issues in the projects	3h
March 7th	Bug fix refresh routes	1h
March 8th	US9: worked on sign in page backend + changed the tests for the sign in routes	2h
March 9th	US9: finished the sign in login page on the front end + Helped Malak debugging make a reservation	3h

Imen

Date	Tasks	Time
13 Feb	Weekly meeting - discussed task planning and details of check-in	30 min
Feb 15th	looked into react, started log in page, figured out set up for different pages and how to use components	7h
Feb 16th	css sign up page	3h30
Feb 17th	accepted pr, css sign up, log in page, tried to link with database but something missing	6h
Feb 18th	helped sydney fix her branch some errors were stopping her from seeing the page and also build errors	1h
Feb 25th	worked on the sign up and sign in with the database, create user id and verify unique emails	7h
Feb 29th	display error message when signing up with email already used, unique CS id's, CR form, started the user handling	4h30
March 1st	helping Rania fix her branch	50m

March 5th	Weekly Meeting	30m
March 8th	Worked on the sign in/ sign up, restrictions based on user and identification	6h
March 9th	Worked on identification, user can view, delete, modify their account	10h
March 10th	Worked on user can view, delete, modify their account	7h
March 11th	Worked on user can modify their account and helped Yaro and Rania with their respective problems	6-10, 1h, 1h30,

Yaroslava

Date	Tasks	Time
13 Feb	Weekly meeting - discussed task planning and details of check-in	30 min
24th	Looked into react	1h
27th	Weekly Meeting - discussed tasks, asked on clarification for database use. Could not connect to the database properly, tried looking for a fix.	1h
March 2nd	Successfully fixed past issues with the database and was able to connect to it, made a simple form for creating a new vehicle, new issues encountered: build was always failing and database was not returning correct values.	1h
March 5th	Weekly Meeting. Tried to add functionality to the create vehicle form. Kept getting the same error.	2h30min
March 8th	Tried to fix the database related error, added styling to the "create new vehicle" form (US5) and integrated it into the website, did some refactoring.	4h
March 10th	Worked on creating a display for all user accounts(US11), tried to fix error related to the posting of vehicles to the database (when trying to submit the "create new vehicle" form), was not successful.	6h
March 11th	Finished display of accounts + added a filter for customer	5h

	accounts (US11), found a workaround for the vehicles posting with the help of Imen(US5). Filled out logs for sprint 2.	

Malak

Date	Tasks	Time
13 Feb	Weekly meeting - discussed task planning and details of check-in.	30 min
16 Feb	Demo of the progress to the TA during the lab	45 min
28 Feb	Worked on the state created from the reservation form (what was going to be sent to the database through the post method)	2h
27 Feb	Weekly meeting : talked about how to launch the website, problems encountered with the Continuous integration workflow on GitHub	
29 Feb	Worked on the verification function of the reservation form	3h
1 March	Went over small errors in the code and typos	30 min
8 March	Wrote meeting minutes of the meeting on the 27th Demo + questions to TA on Continuous integration workflow on GitHub Worked on connecting the code made previously to the website itself	3h
9 March	Worked on making the get request work on the reservation	6h
10 March	Continued and finished working on making the get request work on the reservation	11h
11 March	Went back on the reservation form because the submitting part was stuck and would eventually crash the website Worked on US 12 updating a vehicle, finished the code but some errors are thrown when reaching the page needs debugging	8h

Sydney

Date	Tasks	Time
13 Feb	Weekly meeting - discussed task planning and details of check-in	30 min
18 Feb	Finished the homepage layout and submitted for pr. Worked with Imen to resolve the issues with that merge to the main.	3 h
1 March	Browse vehicles front-end - Read on how to incorporate the back-end and front-end for this feature as well as for future features.	1h
9 March	Worked on browse vehicles - Came across issues with fetching the data from the database. - Tested issues by attempting to add and remove vehicles from the database to see the effects of those changes.	2h
10 March	Finalized US-3 browse vehicles US-13 admin deleting vehicle front-end	2 h
11 March	Finalized US-13 admin deleting vehicle. - Merged respective branches. - Fixed merge conflict issues. - Helped Malak for the update vehicle task.	2 h

Rania

Date	Tasks	Time
13 Feb	Weekly meeting - discussed task planning and details of check-in.	30 min
16 Feb	Meeting with the team and the TA to assess the progress made on the project.	45 mins
29 Feb	Worked on fixing the unit test of cancel reservation and meeting with Christelle to go over the backend-frontend connection.	3 hrs
1 March	Worked on implementing the front-end of Cancel	3 hrs

	Reservation feature.	
5 March	Worked on connecting the front-end and the backend.	5 hrs
6 March	Tried to debug cancel reservation.	4 hrs
8 March	Tried to debug cancel reservation, meeting with team, started the back-end and front-end of view reservation.	6 hrs
9 March	Refactoring, still trying to debug cancel reservation, kept working on view reservation feature.	5 hrs
10 March	Implemented most of the view reservation feature, debugging cancel reservation.	3 hrs
11 March	Finalized view reservation, wrote the acceptance tests for 3 user stories, meeting with Imen to debug cancel reservation, trying to debug view reservation	8 hrs
