TEAM LOGS:

Imen:

Date	Task	Time
jan 30th	weekly meeting	20 min
feb 2nd	we had a team meeting where we divided each feature of the website and also the project description	2h
feb 4th	worked on setting up the database with Christelle	3h
feb 5th	worked on setting up the database with Christelle	4h
feb 6th	Weekly meeting where we discussed a few issues, worked with Cristelle on setting up the database/ server and succeeded	3h
feb 7th	updated the user story description for the CRUD operation user stories (US4, US5 and US6) and i did #2 project approach in the appendix A of the google doc	1h
feb 9th	Worked on dividing the user stories into more specific tasks, decided on story points, priority and risk for each user story with the team	3h
feb 10th	Worked on creating sub tasks for my tasks	30 min
feb 11th	Worked on user descriptions for my tasks, filled out the missing risk descriptions and wrote my personal log	1h

Yaro:

Date	Task	Time
Feb 4th	Did some basic setting up with git on my end. Started looking into tools that might be useful during the development process.	30min
Feb 5th	Researched frameworks that we'll be using in our project like React.js and Node.js as well as more general web dev. Tried playing around with React.js to get more familiar with it.	2h
Feb 6th	Wrote documentation about one of the frontend frameworks. Had a general team meeting to discuss future plans.	2h
Feb 9th	Worked on the plan for sprint 2 with Christelle and Imen, we split the main 6 user stories into more specific tasks in the Excel sheet. Started the readme file. We also had a team meeting to separate each task and discuss the priority, risk and due date of each task.	2h
Feb 11th	Updated some of the user stories assigned to me + added subtasks, updated the readme file, and updated my logs.	1h
Feb 12th	Wrote documentation about the final frontend frameworks.	1h

Christelle:

Date	Tasks	Time
Feb 2nd	Meeting with the team. We discussed every aspect of the project, shared ideas etc.	2h
Feb 3rd	30 min - with Rania to teach her the basics of git hub 2h - Github set up: Set up the git hub project, write some user stories and assigned them based on the meeting discussion from the day before, initial commit with project file structure, wrote the meeting minutes 1,2,3 1h - Research and implement the testing tool (Jest) and GitHub workflow.	3h30
Feb 4th	1h - Finish implementing the continuous integration and start implementing the continuous deployment 3h - Researched database and worked on setting up the database with Imen	4h
Feb 5th	Worked on setting up the database with Imen	4h
Feb 6th	Weekly meeting to discuss the database issue and finish setting up the database hosting with Imen	3h
Feb 7th	Wrote meeting minutes 4	15 min
Feb 9th	2h - Research and writing the Backend Frameworks for the Approach and Technology document 2h - Worked with Imen and Yaro on rewriting the user stories for sprint 2 and team meeting to set up the user points, risks and priorities	4h
Feb 10th	1h - Finish the Backend framework section of the approach and technology document, wrote meeting minutes 5 2h - Wrote the User descriptions for the new user stories and their subtasks	3h

Malak:

Date	Task	Time
Feb 2nd	meeting after lab with team where we discussed the overall project, the planning, the task breakdown, the assignment of the tasks to their assigned person etc	2h
Feb 3rd	setup react, worked on the reservation form (was waiting for hosted database to work further on the form)	5h
Feb 6th	weekly meeting with the team to find a way to host the database worked on the initial user story for the reservation form	2h
Feb 7th	worked on the user story for view/cancel/modify reservation and created the excel for the plan for sprint 2 with all the information that we already had (user story + issue number + assignee)	2h
Feb 9th	team meeting before/during lab where the contents of the plan for sprint 2 were discussed	2h
Feb 11th	Worked on user story for check in, updated the user story for reservation + added all the subtasks linked to both user stories that were being worked on	1.5h
Feb 12th	Finished the 4.2 section and 4.1 outline of frontend strategy of the project approach, Setup the wiki for the github + the plan for the second sprint	3.5h

Rania:

Date	Task	Time
Feb 3rd	30 min with Christelle who gave me an overview of github and git. 1h working on implementing a unit test for canceling reservation and started implementing the code.	1h30
Feb 5th	I wrote the documentation about strategy integration of the backend technologies and I finished my code of canceling the reservation including checking if the confirmation number is in valid format, found in DB and the status is updated to available after the cancellation has been processed.	2h
Feb 6th	Meeting with the team at school to go over the progress of the project.	1h
Feb 7th	Wrote some security considerations for both the backend and frontend.	1h
Feb 9th	Meeting with the team and the TA to go over the division of stories into substories. Mainly implemented the plan for Sprint 2 with the team.	2h
Feb 10th	Completed the property column of the excel sheet about the sprint 2 plan.	1h
Feb 12th	Completed the User stories description and the parts of the google docs to which I was assigned.	1h30

Sydney:

Date	Task	Time
Feb 3rd	Designed the front-end homepage for the web application on Figma and wrote in the project overview section.	2h
Feb 4th	Created a new branch and started implementing the front-end into code.	2h
